

Lexibook® innovates in the board game segment and launches electronic versions of these 3 great classics: a talking sea-battle, the revisited hangman game and a luminous chess computer!

Lexibook® innovates in the board game segment and launches electronic versions of these 3 great classics: a talking naval battle, the revisited hangman game, and a luminous chess computer! Electronics adds real value to the gameplay with eye-catching light and sound effects. You can even go head to head with the computer in single-player modes in the talking sea-battle and chess games!

An electronic naval battle for epic battles in four languages!

This naval battle game offers a unique and immersive gaming experience thanks to its talking function and ultra-realistic sound and light effects. It is the ideal interactive game to teach young children the basics of strategy. Realistic combat sounds reflect the situation of the game (preparation, shots, missed target, hit, sink) to experience the intensity of battle. Players will be able to step into the shoes of a strategist leading his ships to ultimate victory!

Play with 2 players or alone against the computer!

The interactive game enables you to play with 1 or 2 players: you can play directly against the artificial intelligence of the computer or challenge a friend! Naval battle will interact with you thanks to its talking function. You can choose the spoken language (French, Italian, Dutch, or German). You can adjust the difficulty thanks to its two levels: normal mode, or advanced mode in which the computer does not specify which ship is hit.

Electronic hangman: a game that is both fun and educational!

This real hangman game in an electronic version and provides hours of fun with family and friends! Both fun and educational: perfect for developing your reflexes but also ideal for enriching your vocabulary and becoming a champion of spelling. On the player side: be the first one to guess ten words to win! Master side: choose the words and outwit your opponent! Amazing light and sound effects guide players through the game for endless fun. The ingenious design allows you to keep the scores, store the tokens, watch the bomb light up when the end of the timer approaches, and of course, watch the hangman segments light up!

ChessLight®, the chess computer with light up pieces!

ChessLight® is the perfect electronic chess game to teach you how to play or improve your chess skills. Featuring 64 difficulty levels, it is suitable for beginners, experienced and professional players (computer performance level: ELO 1800). Its tactile game board records movements when you tap the played piece from its original square to the destination square. Thanks to its 64 diodes, the translucent pieces light up to visualize your moves and those of the computer. Its many functions offer you unmatched game interactivity whatever the player level: "hint" function to suggest a move, "training" mode to indicate whether the move played is the optimal one, "takeback" function to go back up to two moves, "multimove" function to referee a game between two players.
